- The Head Start program (for children ages 3-5) and Early Head Start program (for pregnant women, infants, and toddlers) promote school readiness for children in low-income families by providing comprehensive educational, health, nutritional, and social services. Parents play a large roll in the programs, both as primary educators of their children and as participants in administering the programs locally. Both programs provide pre- literacy and literacy experiences in a multi-cultural environment. Parents are also provided social services, including assistance with childcare.
