

Mental Health

There is a shortage of mental health professionals and people are unaware or unable to access services.

Adams, Clay, Nuckolls and Webster Counties are designated Federal and State mental health professions shortage areas.

What do the South Heartland numbers say?

9-12th GRADERS

- 28% were depressed in the past year
- 19% considered suicide
- 13% attempted suicide

43% of adolescents with depression receive the treatment they need

ADULTS

- 20% reported depression
- 9% reported frequent mental distress

47% of adults with mental illness receive the treatment they need

"Our community needs to be more vocal about the issues leading up to suicide. I know more teens that have died from suicide in the past year than I have in my whole life – and they all have happened in Hastings."

Resident response to SHDHD Community Themes and Strengths Assessment, 2018

"Mental Illness is an important public health problem in itself and is also associated with chronic medical conditions such as cardiovascular disease, diabetes, obesity, and cancer."

Ileana Arias, Ph.D., Centers for Disease Control and Prevention

Our goal is to improve mental health through prevention and by ensuring access to appropriate, quality mental health services.

We are working together to connect people to timely and appropriate mental health services.

STRATEGIES/OBJECTIVES

Action

Setting

Promote screening and assessment to facilitate referral.

Providers, schools, community

Train professionals and community members.

Providers, community, public health department

Create a local Behavioral Health Advocacy Group.

Community

Expand use of proven technologies for mental health services

Health care, behavioral health care and community

Create a health services resource guide

Libraries, schools, clinics, hospitals, community, public health department

EXPECTED RESULTS

Fewer youth feel sad or hopeless

Fewer youth attempt suicide

More people receive timely mental health services

Fewer adults have depression

Fewer adults have frequent mental distress
